Directions

Ceramic Decals fire onto glazed ceramics or porcelain at 1472°F degrees and hold for 30 minutes or cone 015.

TIP: Most decals can be fired in multiple layers. E.g., if you want a hummingbird hovering near a flower, you can place a decal of a hummingbird over a separate decal of a flower. After they have dried, they can be fired together. Fire all decals onto the glazed item before applying Art Clay Silver.

Ceramic Decals are available through retail ceramic shops that carry greenware, or from ceramic suppliers that carry slip and molds. Check your local yellow pages for a retail location near you. Watch your area for Ceramic Shows, most large communities will have a yearly show and distributors of decals will have bins of decals to choose from.
