

Material Safety Data Sheet

Acc. to ISO/DIS 11014

Printing date 06/20/2006 Reviewed on 06/20/2008

· Product details

· Trade name: Magic-Glos

· Article number: UV Formulation

Supplier:

JHB International.

· Information department: Product safety department.

· Chemical characterization

· Description: Mixture of the substances listed below with nonhazardous additions.

· Dangerous components:

25068-38-6 reaction product: bisphenol-A-(epichlorhydrin) resin (number average molecular Weight \leq 700) 50-100% 2386-87-0 7-Oxabicyclo[4.1.0]heptane-3-carboxylic acid, 7-oxabicyclo[4.1.0]hept-3-ylmethyl ester 25-50% 37625-56-2 2-Oxepanone, polymer with 2-ethyl-2-(hydroxymethyl)-1,3-propanediol 10-25%

· Additional information:

HEALTH HAZARDS / ROUTES OF EXPOSURE

INHALATION: *No significant signs or symptoms indicative of any adverse health hazard are expected to occur at standard conditions due to the low volatility of this material. However, aerosols, or vapors which may be generated at elevated processing temperatures, may cause respiratory tract irritation. Symptoms of irritation may include coughing, mucous production and shortness of breath.*

EYE CONTACT -- PRIMARY ROUTE: *Although no appropriate human or animal health effects data are known to exist, this material is expected to cause eye irritation. May cause moderate irritation with symptoms including burning sensation, tearing, redness or swelling.*

SKIN ABSORPTION -- PRIMARY ROUTE: Although no appropriate human or animal health effects data are known to exist, this material is expected to be a slight skin absorption hazard.

SKIN IRRITATION -- PRIMARY ROUTE: Although no appropriate human or animal health effects data are known to exist, this material is expected to be a skin irritant. Symptoms may include localized redness or rash and swelling of the affected area. Symptoms may be delayed. A more severe skin response may occur after prolonged contact with this material. Although no appropriate human or animal health effects data is known to exist, this material may cause an allergic skin reaction (sensitization) in susceptible individuals upon repeated exposure.

INGESTION: Although no appropriate human or animal health effects data are known to exist, this material is expected to be a slight ingestion hazard.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: This material or its emissions may induce an allergenic sensitization reaction and thereby aggravate systemic disease.

· Hazard description:

Irritant

Dangerous for the environment

· Information pertaining to particular dangers for man and environment:

Irritating to eyes and skin.

May cause sensitization by skin contact.

Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Only for trade users / technical specialists

Keep out of the reach of children.

· Classification system:

The classification was made according to the latest editions of international substances lists, and expanded upon from company and literature data.

· NFPA ratings (scale 0 - 4)

Health = 1

Fire = 1

Reactivity = 0

· HMIS-ratings (scale 0 - 4)

REACTIVITY

0

Health = 1

Fire = 1

Reactivity = 0

· Additional information:

WARNING! This is a light sensitive product polymerized by exposure to UV Light. Do not expose to Ultraviolet

Light/Radiation, Direct Sunlight, High temperatures (>100 F), and oxidizing agents.

High temperatures, exposure to light, radiation exposure, inhibitor depletion, accidental impurities, inert gas blanketing, and oxidizing agents may cause spontaneous polymerization reaction. Polymerization in large masses may cause excess exothermic reaction generating heat and also pressure. Closed containers may rupture or explode during runaway polymerization.

· After inhalation:

Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist.

In case of unconsciousness place patient stably in side position for transportation.

· After skin contact:

Immediately wash with water and soap and rinse thoroughly.

If skin irritation continues, consult a doctor.

· After eye contact:

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.

· After swallowing:

If symptoms persist consult doctor.

A person vomiting while lying on their back should be turned onto their side.

DO NOT attempt to give anything by mouth to an unconscious person.

· Suitable extinguishing agents:

CO₂, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

Use fire fighting measures that suit the environment.

· Special hazards caused by the material, its products of combustion or resulting gases:

High temperatures, exposure to light, radiation exposure, inhibitor depletion, accidental impurities, inert gas blanketing, and oxidizing agents may cause spontaneous polymerization reaction. Polymerization in large masses may cause excess exothermic reaction generating heat and also pressure. Closed containers may rupture or explode during runaway polymerization.

· Protective equipment:

Wear fully protective suit.

Do not inhale explosion gases or combustion gases.

Do not enter fire area with out proper protection. Acrid smoke-fumes/carbon monoxide/carbon dioxide/nitrogen oxides and perhaps other toxic vapors may be released during a fire involving this product. fight fire from safe distance/protected location. Heat/impurities may increase temperature/build pressure/rupture closed containers, spreading fire, increasing risk of burns/injuries. Water may be ineffective in firefighting due to low solubility.

Use water spray/fog for cooling. Pressure relief system may plug with solids, increasing risk of overpressure.

Notify authorities if liquid enters sewer/public waters.

· *Person-related safety precautions:*

Wear protective clothing.

Keep people at a distance and stay upwind.

· *Measures for environmental protection:*

Do not allow product to reach sewage system or any water course.

Inform respective authorities in case of seepage into water course or sewage system.

Do not allow to enter sewers/ surface or ground water.

· *Measures for cleaning/collecting:*

Ensure adequate ventilation.

Spilled or released material may polymerize and release heat/gases. Extinguish all ignition sources and ventilate area. Wear protective equipment during clean up. Dike and recover large spill. Soak up small spill with inert solids (such as vermiculite, clay) and sweep/shovel into vented disposal container. Wash spill area with a strong detergent and water solution; rinse with water but minimize water use during clean up. For spills on water, contain, minimize dispersion and collect. Dispose/report per regulatory requirements.

· *Handling:*

· *Information for safe handling:*

Ensure good ventilation/exhaustion at the workplace.

Wear appropriate protective equipment when handling this material (See Section 8 of MSDS). Do not use localized heat sources such as ovens or band heaters to heat product. Exposing this product to elevated temperatures (>100 F) may compromise the product quality and/or result in an uncontrolled hazardous polymerization. Product is packaged with inhibitor(s). The product's inhibitor(s) require the presence of dissolved oxygen. Maintain, at a minimum, the original headspace in the product container and do not blanket or mix with oxygen-free gas, as it renders inhibitor ineffective.

· **Information about protection against explosions and fires:** No special measures required.

· **Storage:**

· **Requirements to be met by storerooms and receptacles:**

Store only in the original receptacle.

Store in dark area away from light.

Store at temperatures between 25 C - 35 C.

Store indoors. DO NOT EXPOSE TO OXYGEN-FREE GAS.

· **Information about storage in one common storage facility:** Not required.

· **Further information about storage conditions:** Keep receptacle tightly sealed.

· **Additional information about design of technical systems:**

If handling results in aerosol or vapor generation, local exhaust ventilation is recommended.

· **Components with limit values that require monitoring at the workplace:**

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

· **Additional information:** The lists that were valid during the creation were used as basis.

· **Personal protective equipment:**

· **General protective and hygienic measures:**

The usual precautionary measures for handling chemicals should be followed.

Avoid contact with the eyes and skin.

Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities.

Promptly remove soiled clothing/wash thoroughly before reuse. Shower after work using plenty of soap and

water.

· Breathing equipment:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

If this material is handled at elevated temperatures or under mist/vapor forming conditions, NIOSH/MSHA approved respiratory protection equipment should be used.

· Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye protection:

Tightly sealed goggles

· Body protection: Impervious protective clothing

· General Information

Form: *Liquid*

Color: *According to product specification*

Odor: *Mild*

· **Change in condition**

Melting point/Melting range: *Undetermined.*

Boiling point/Boiling range: *211°C (412°F)*

· **Flash point:** *118°C (244°F)*

· **Auto igniting:** *Product is not self-igniting.*

· **Primary irritant effect:**

· **on the skin:** *Irritant to skin and mucous membranes.*

· **on the eye:** *Irritating effect.*

· **Sensitization:** *Sensitization possible through skin contact.*

· **Additional toxicological information:**

The product shows the following dangers according to internally approved calculation methods for preparations:

Irritant

· **Ecotoxicological effects:**

· **Remark:** *Toxic for fish*

· **General notes:**

Water hazard class 2 (Self-assessment): hazardous for water

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

Also poisonous for fish and plankton in water bodies.

Toxic for aquatic organisms

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

· Uncleaned packaging:

· Recommendation:

Disposal must be made according to official regulations.

Dispose of in accordance to all local, state, and/or national re legislation.

· DOT regulations:

· Hazard class: -

· Remarks: *Not regulated.*

· Maritime transport IMDG:

· IMDG Class: -

· Marine pollutant: *No*

· Remarks: *Not regulated.*

· Air transport ICAO-TI and IATA-DGR:

· ICAO/IATA Class: -

· Remarks: *Not regulated*

· **Product related hazard information:**

The product has been classified and marked in accordance with directives on hazardous materials.

· **Hazard symbols:**

Irritant

Dangerous for the environment

· **Hazard-determining components of labeling:**

reaction product: bisphenol-A-(epichlorhydrin) resin (number average molecular weight ≤ 700)

· **Risk phrases:**

Irritating to eyes and skin.

May cause sensitization by skin contact.

Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

· **Safety phrases:**

Keep out of the reach of children.

Avoid contact with skin and eyes.

Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point.

Do not breathe fumes/aerosol.

Wear suitable protective clothing, gloves and eye/face protection.

Use only in well-ventilated areas.

After contact with skin, wash immediately with plenty of soap and water.

*· **Special labeling of certain preparations:***
